

Pokémon GO

a quantitative approach

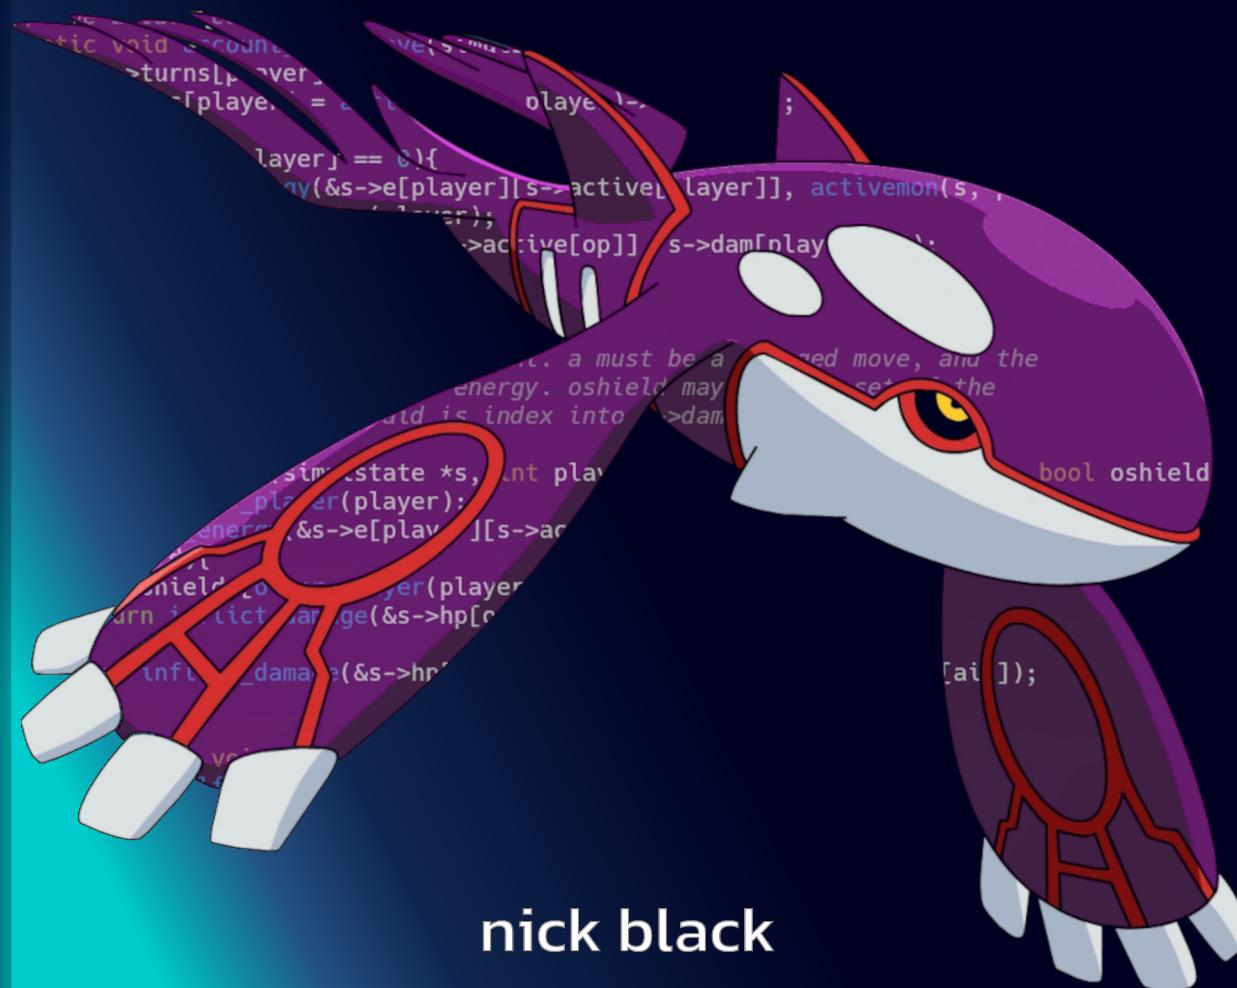

nick black

A complete reference to Pokmon GO with a focus on GO Battle League PvP play, fully up to date for Season 23. Contains detailed synopses of every available Pokmon form and attack, strategies for 3x3, Max Battles, and raids, and extensive discussion of team selection. Wherever possible, data have been extracted directly from the most recent APK, and their treatment is fully quantitative. Culminates with presentation of the author's exhaustive 3x3 simulator, plus commented source code. Over 100 tables and 300 color pages. nick black attained the Expert rank his first season in the GO Battle League.
